

G500-GU harness, 5F-11 H51 display and Optime I (P3E) earmuffs yellow

The 3M™ G500 Head Harness offers a versatile and comfortable solution for workers who require facial and hearing protection at the same time. Thanks to its unique design features, it can be easily combined with other 3M safety products such as displays, passive or communication earmuffs and integrated eye protectors.

- A practical and convenient solution for face and hearing protection, when head protection is not necessary
- Front protection that provides great ventilation for greater comfort. It is designed to be compatible with communication equipment
- Colorless polycarbonate face shield that provides protection against high-velocity particles 190 m/s according to EN166:2001 standard
- To increase eye protection, G500 can incorporate V6 eye protection* (which is available in clear, gray or yellow)
- Hearing protection: Thanks to its robust design, G500 can be used with compatible 3M PELTOR P3E helmet connection hearing protection earmuffs
- Headband with connection for helmet earmuffs
