

U-shaped handles in stainless steel for furniture

We offer **stainless steel handles for furniture** in stainless steel processing industries and for the wood and plastic manufacturing industry, where a corrosion-resistant material with good mechanical resistance is required.

In addition to the more conventional “U” shaped handles, in this catalog you can find a wide range of stainless steel handles with exclusive designs that can be used in a **multitude of applications**, such as integral furniture, domestic or industrial kitchens and industrial metal furniture. .

In the catalog that we have attached, there are many more models of handles.
