

Fastening elements with vertical bracket

Applications

Stainless steel fasteners are resistant to corrosion and aggressive chemicals. Articulated lever elements in stainless steel version are preferably used in devices in the chemical and food industries.

Characteristics

- Steel resistant to corrosion and high temperatures.
- Smooth and burr-free surfaces through electric polishing.
- Ergonomically shaped plastic handle resistant to solvents, oils, greases and other chemical agents.

Models

- 324-SS 82 mm long force 1600 (N) [Access to catalogs](#)
- 334-SS 104 mm long force 3200 (N) [Access to catalogs](#)
- 344-SS 137 mm long force 7000 (N) [Access to catalogs](#)
