

XH type feet

The design of the bases are patented and any of the movable elements are 100% hygienic.

This is the reason why XH bases are approved for use in equipment and machinery and equipment used in manufacturing manufacturing in the dairy, meat and pharmacy sectors. It is recommended to use bases. XH in places where the cleaning requirement is very high. The detail of the XH reduces the period needed for cleaning to a minimum. The cover surrounds the thread of the stud and acts as a nut at the same time. It manages to reach up to 10° unevenness on the ground and machines. The anagram of EHEDG and 3A is visible on the XH bases.
