

Oval manhole art. 211

Oval mouth in **AISI 316** or **AISI 304** stainless steel.

It is applied to the side of the bottom of the tanks and its use allows it to withstand a pressure of 1.5 bar. It has a horizontal interior opening that offers the possibility of an exit from the cover with a support arm with a stainless frame.

It has a useful passage light of 450 x 320 mm.
