

Connecting rod fastening elements

Applications

The straight line toggle clamps are stainless steel and resistant to corrosion and chemical agents. The lever mechanism in the stainless steel model is approved for use in the chemical and food industries.

Features

- Steel resistant to corrosion and high temperatures.
- Smooth, electropolished surfaces without burrs.
- Ergonomic, plastic handle is resistant to solvents, oils, greases and other chemical agents (except 601-SS models).

Accessories

- The stainless steel clamps are generally supplied with standard adjustment spindles in stainless steel.
