

Horizontal closure fasteners with hook

Applications

Stainless steel fasteners are resistant to corrosion and aggressive chemicals. Articulated lever elements in stainless steel version are preferably used in devices in the chemical and food industries.

Characteristics

- Steel resistant to corrosion and high temperatures.
- Smooth and burr-free surfaces through electric polishing.
- Ergonomically shaped plastic handle resistant to solvents, oils, greases and other chemical agents.

Models

- 330-SS 140 mm long force 900 (N) [Access to catalogs](#)
- 351-SS 216 mm long force 2200 (N) [Access to catalogs](#)
- 371-SS 305 mm long force 3400 (N) [Access to catalogs](#)
- 381-SS 346 mm long force 4500 (N) [Access to catalogs](#)
