

Cylindrical Allen screw DIN-912 ISO-4762

Cylindrical Allen screw with hexagonal interior in stainless steel
DIN 912 = ISO 4762.

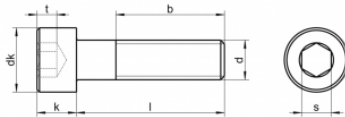

This standard applies to screws with partial threads in which standard screws must have the quality type of stainless steel marked on the head. This can be A-2 = ASI-304 or A-4 = ASI-316. Furthermore, the tensile strength is usually 70 or 80 N/mm².

The tensile breaking load: $R_m(N/mm^2) > R_m = 1st \text{ and } 2nd \text{ figure fra} \times 100.$

Stainless steel grades A, A-2, A-4 and others upon request.

AISI	A	DIN EN	DESIGNACION
304	A2	1.4301	X5CrNi 18-10
316	A4	1.4401	X5CrNiMo 17-12-2
